

Case Study

Al Samim.

Famco handles glass with care.

“On major projects like this, Famco is able to offer the customer a ‘one stop shop’ approach and a package of products that competitor companies find hard to match.”

Located in the Jebel Ali Free Zone in Dubai, Al Samim Group is the largest manufacturer, importer and exporter of high quality, household glass products in the United Arab Emirates.

Al Samim contracted Famco, the Dexion Supply Centre in Dubai, to design a storage system for its new warehouse. It's a massive, 5,550,000AED project, with the racking system providing 34,500 pallet positions for both palletised goods and smaller hand loaded items.

Famco is in a relatively unique position for a company in the United Arab Emirates as it boasts a product range which includes the Linde range of material handling equipment and the Nassau/Stertil range of roller shutter doors and dock levellers.

On major projects like this, Famco is able to offer the customer a “one stop shop”

approach and a package of products that competitor companies find hard to match. As well as the storage system, Famco supplied Al Samim with 4 Linde Very Narrow Aisle Trucks, 4 Reach Trucks, 4 Counter Balance Trucks and 5 Powered Pallet Trucks. Famco also supplied 24 Dock Levellers, 8 Over Head Doors plus accessories for the project.

Facts about the storage system.

The Very Narrow Aisle Dexion pallet racking system is 12,000mm high and consists of 41 double entry and 2 single entry runs of racking designed to store 34,500 pallets.

Smaller hand loaded items are stored in a 10,500mm high 4 tier racking system.
