

Dexion Dynamic Locking Range - Silver

Aspire 5G

Axis 5G

Cue 5G

Range 5G

Sola 5G

Versa 5G

Product overview

The Dexion Dynamic Locking Range offers users three distinct levels of locking, each with varying connectivity, security and functionality options. Silver level locking offers Keypad, RFID or Mobile App operated locks.

Silver Dynamic Locking takes the pain out of key management, offering locks with enhanced functionality to use in new or retrofit applications. Future proof your security with a lock range which provides cam, deadlatch or deadbolt latch options, dual functionality locking (Shared or Assigned Use), various body shapes, orientation and mounting configurations to suit multiple door thicknesses.

Facility staff will appreciate a selection of Basic or Advanced management systems including Electronic Keys to enable master key access, quickly program large quantities of locks or download audit trails. Installation of these low maintenance locks is quick and easy. RFID locks can often be operated using existing customer RFID credentials.
