# Dexion EasyFit<sup>®</sup> Wire Compactus<sup>®</sup>

The Dexion EasyFit<sup>®</sup> Wire Compactus<sup>®</sup> provides a clear, continuous area for optimal sterilisation and can dramatically improve the storage capacity of your floor space. EasyFit<sup>®</sup> Wire Compactus<sup>®</sup> can easily be re-configured to suit storage of any kind, including medical equipment and consumables.

EasyFit<sup>®</sup> Wire Compactus<sup>®</sup> utilises an overhead rail to guide the mobile shelving bays within the unit, which are fitted with castors to ensure the floor below can easily be cleaned.

The EasyFit<sup>®</sup> range is designed specifically for clinical environments to minimise the surface area which can harbour bacteria or dust and to allow a constant flow of air around the stored items. The EasyFit<sup>®</sup> Wire Compactus<sup>®</sup> is available in four finish options to suit your application; Chrome, zinc plated, epoxy powder-coated with antimicrobial coating and stainless steel.

## Key features and benefits

- ✔ Designed to suit clinical environments
- ✔ Easy to clean
- ✔ Maximises storage capacity in the available floor space
- ✔ Greater accessibility to stock and stored items
- ✔ Better visibility to stored items
- ✔ Wide range of accessories

# Dexion EasyFit® Wire Shelving

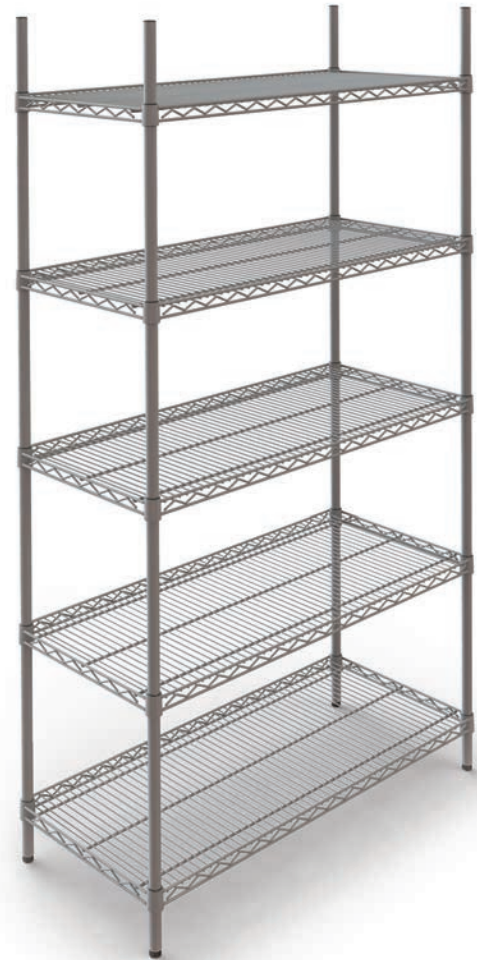

The Dexion EasyFit® Wire Shelving is a system that has been designed to help improve the storage capacity of your floor space that may be otherwise unusable i.e. corners. EasyFit® Wire Shelving can easily be re-configured to suit storage of any kind including medical equipment and consumables.

The range offers four durable and functional finishes; chrome for dry environments; zinc plated; epoxy powder-coated with antimicrobial coating for bacteria control in wet or dry environments and stainless steel for harsh or very wet environments. With its modern, industrial look, our chrome units are ideal for all types of general storage applications.

This flexible system does not require any tools to assemble, adjust shelf heights or to level. The wide range of optional accessories include posts, shelves, post connectors, corner unit connectors, mobile unit bumpers, baskets, castors, hangers, handles, rails, dividers, ledges and label holders which ensure the system can meet your storage needs now and into the future.

## Key features and benefits

- ✔ Versatile system, easily dismantled and repositioned
- ✔ Readily customised using our options and accessories
- ✔ Flexibility to add units as your needs change or grow
- ✔ Special sizes and accessories available

Dexion EasyFit® Wire Basket

Dexion Maxi Bin

# Dexion EasyFit® Wire Baskets

The Dexion EasyFit® Wire Baskets are a range of quality baskets which fit onto the Dexion louvre panel. The baskets are designed to interchange with the Dexion Maxi Bin range (P5, P10, P20, P30, P40, P60), which is used extensively throughout medical facilities.

The wire basket design greatly enhances the ability to effectively store sterilised medical supplies. Each basket has a double wire on the top edge to ensure there are no sharp edges and can easily be removed from the panel for restocking or relocation of stored items. Easyfit® Wire Basket has a fine mesh of 8 x 8mm.

# Dexion Ultima® CI-80 Shelving

This versatile shelving system meets the demands of your facility today and into the future. Suitable for virtually any storage application and easily converted to a mobile system at any time with Compactus bases and runners. Ultima® CI-80 is a modular design offering design flexibility, load capacity and a host of accessories to meet your specific requirements. Its clean smart finish is at home in front office and back of house applications.

The Ultima CI-80 Shelving has been awarded a 'Level A' Greentag certification to help deliver greener project outcomes for our clients.

# Dexion Safety Rails

Seismic activity can have a devastating effect on our lives, whether it be personal or business. Whilst we can't eliminate seismic events, Dexion can help prevent the impact and protect your products, employees and livelihood from harm.

The Dexion Safety Rail is a revolutionary device that can easily be fitted to any existing Dexion shelving products, such as our mobile Compactus® units or to products from other manufacturers. Once fitted, the risk of stocked items being damaged and falling from shelving during seismic activity is significantly reduced, whilst still enabling the contents to be easily accessible.

The Dexion Safety Rail is designed to provide protection and peace of mind at an affordable price. Unlike other products on the market, the clever design does not inhibit access to stored items, the rail is simply lifted and lowered to provide access to stored items and then replaced in the same manner. The device is unobtrusive, stylish, and requires no tools to install and is exclusively available through Dexion.

# Dexion Agile Lockers with Dynamic Locking

Dexion Agile Lockers offer a wide range of flexibility to meet the growing demand for locker solutions within today's health facilities and workplace environments.

Dexion recognises the importance of a functional and ergonomic locker that supports your day to day business activities. Agile Lockers have been designed with adaptability in mind and can be configured to meet your specific needs.

Frequently utilised in ABW (Activity Based Workplace) environments, the Agile Lockers are cleverly designed to work in harmony with the Dynamic Locking range.

The Agile Lockers are available in three different heights and four different configurations as a standard. The lockers have a 150mm kick plate at the base which covers adjustable feet to ensure the product can be levelled on uneven flooring.

The internal space of the lockers includes a shelf that provides a clear space for mail deliveries and can be adjusted.

## Key features and benefits

- ✔ Agile Lockers are designed and manufactured from hard wearing melamine with an exterior finish which can be selected from common ranges such as Laminex.
- ✔ The design provides superior accessibility for critical lock system components, which means the lockers don't need to be dismantled for typical service and maintenance.
- ✔ Construction is of the highest quality and incorporates features which are rarely presented in other designs. These features include adjustable levelling feet, intermediate shelves notched to locate on shelf pins (so they cannot be easily dislodged) and a chamfer on the back of each mail slot for user friendly mail delivery.
- ✔ Dexion also offers steel construction options for a full system or for the carcass with melamine doors and exterior. Steel lockers are more durable and reduce the floor space consumed.
- ✔ Dexion's Agile Lockers in conjunction with Dynamic Locking, offers one of the most sophisticated, functional and competitive locker and locking solutions available in the market. Dexion can provide a tailored turnkey solution which is easily scaled to your business requirements.
- ✔ Dexion Agile Lockers are GreenTag Level B certified

# Dexion Mekdrive 3 Compactus<sup>®</sup>

Dexion's Mekdrive 3 Compactus<sup>®</sup> revolutionises filing and storage systems with advanced technology and design. The Mekdrive 3 Compactus<sup>®</sup> now has up to 78% more storage capacity with increased width from 2700mm to 4800mm. Enhancements include a modern and unique stylised hand-wheel with integrated spinner handle, providing safer and easier operation.

The Mekdrive 3 Compactus<sup>®</sup> is the lightest mechanically assisted mobile storage system available. It has been designed to keep floor loads to a minimum, a major consideration in commercial office buildings. The Mekdrive 3 Compactus<sup>®</sup> has an increased system width of four shelving bays, which could previously only be achieved with fixed-track systems. The Mekdrive 3 Compactus<sup>®</sup> provides incredible value and cost efficiencies when compared with traditional mechanically operated fixed-track systems.

The robust chain drive and ergonomically designed hand-wheel now moves up to 6,000kg (previously 4,000kg) block loads effortlessly, eliminating operator strain. The system includes patented pivoting ramps which can accommodate varying floor contours, unique to the Mekdrive 3 Compactus<sup>®</sup>.

Users of the Dexion Freetrack system can easily upgrade from their existing hand operated unit to the Mekdrive 3 system for improved operation.

# Dexion MaxiDRIVE Compactus®

The MaxiDRIVE Compactus® is the ultimate solution for the storage of large volumes of contents, heavy or bulky items.

Capable of carriage lengths of up to a staggering 14,440mm (nominal) as standard, MaxiDRIVE delivers superior storage density in a mechanically operated system for your available floor area, catering for patient records or any item in the storeroom, warehouse or archive.

The improved track design boasts an 'anti-tilt' mechanism located in the track and structural infill floors between tracks with a 'walk-up' ramp at the entry to aisles providing a safe and solid working platform which reduces trip hazards and allows easy access for trolleys or wheelchairs.

#### MaxiDRIVE Compactus® Features:

- ✔ Unique handwheel disc design with spinner handle delivers superior user safety via a 'Hub Lock' which prevents mobile carriages from moving during user access
- ✔ New stylish finishing panel design provides square edge flush finish which is easily customised
- ✔ Mechanically assisted operation that reduce operator strain with loads up to 1000kg per metre, reducing the risk of OH&S
- ✔ In Track Anti-tilt mechanism reduces overall unit height for better space utilisation
- ✔ Seismic compliant installation available on request
