

Dexion Safety Rail

Product overview

While accidents in the workplace cannot be eliminated, implementing safety systems that will help prevent the risk of serious injury and loss of valuable stock is essential in today's workplace.

The Dexion Safety Rail is a revolutionary device that can easily be fitted to any existing Dexion shelving products or products from other manufacturers. Once fitted, the risk of stocked items falling from shelving is significantly reduced, whilst still enabling the contents to be easily accessible.

The Dexion Safety Rail is designed to provide protection and ease of mind at an affordable price. The clever design does not inhibit access to items, the rail is simply lifted and lowered to provide access to stored items and then replaced in the same manner. The device is unobtrusive, stylish and requires no tools to install.

The Dexion Safety Rail is compatible with our Mobile Compactus® units, which work to prevent valuable items falling off shelves during the opening or closing of the unit. For galleries and museums, the Dexion Safety Rail provides a safeguard to prevent irreplaceable artefacts from being knocked off shelving and damaged or destroyed.

For retail businesses, the Dexion Safety Rail reduces the risk of heavy items stored on precariously high shelving from falling and causing injury to employees and customers.

Key features and benefits

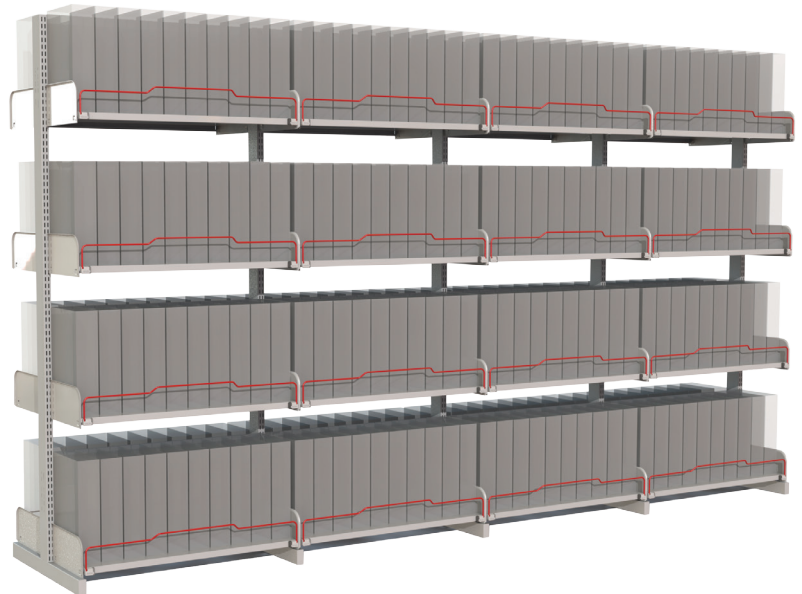

- The Dexion Safety Rail reduces the risk of valuable products and archives falling from shelving.
- The Dexion Safety Rail has successfully passed shake table and impact testing, making this product perfect for preventative measures in seismic areas.
- Provides a safeguard to your employees, preventing unnecessary injuries and near misses, as well as protecting products from damage.
- The Dexion Safety Rail retainer comes in a high strength polycarbonate retainer - Grey and White, two tone.
- Custom sized, allowing it to be easily installed to any of the Dexion shelving units or existing shelving from other manufacturers. Installation is at a minimal cost and requires no ongoing maintenance.
- The Dexion Safety Rail comes in three finishes, powder coated, zinc plated and stainless steel and the colour can be tailored to your companies brand requirements.

Dexion Safety Rail
