

Dexion Hospital Bedlift

Vertical stacking of hospital beds delivers efficient storage

Product overview

The Dexion Vidir Hospital Bedlift is a cost effective hospital bed storage system designed to store hospital beds off of the floor and stack them securely in a vertical arrangement. This not only saves valuable floor space but removes potential hazards from hospital corridors. The hospital bed storage rack will increase the hospital's storage capacity, organisation, and product flow, reducing down time, which increases the number of beds available for patient use at any given moment.

Key features and benefits

- Capacity for up to 5 hospital beds per Bedlift
- Reduces hallway 'clutter'
- Saves up to 70% of floor space per unit
- Beds are easily accessible reducing required time to retrieve hospital beds
- Provides a safe and dedicated storage location for high end hospital beds
- Easy to use – semi-automatic system lowers and raises beds at the push of a button

Dexion Hospital Bedlift

Bedlift Range

BEDLIFT_R

The R Series (Regular Duty) is designed to accept 80-90% of all hospital beds with a vertical pitch of 27" and capacity of 600lbs. per position. The unit loads from the front.

BEDLIFT_S

The S Series (Side Load) Bedlift is designed to load using the width of the bed requiring less floor space for loading. This is for spaces with a unique profile and space constraints.

BEDLIFT_X

The X Series (Extra Capacity) is designed to accept the remaining 10-20% of beds with a larger vertical pitch of 33" and capacity of 900 lbs. per position. The unit loads from the front.

BEDLIFT_N

The N Series (Narrow) is designed specifically for narrower profile beds, stretchers, and operating tables. The unit has a width of 31.5". The unit Loads from the front.
